TEST PLAN - Payroll Application for

1. INTRODUCTION

Test Plan outlines the overall testing strategy, scope, approach, resources, responsibilities, environment, risks, and schedule for validating the Payroll Application. The purpose of this document is to ensure that the Payroll system is thoroughly tested to meet the functional, non-functional, and business requirements related to employee salary processing, statutory compliance, tax deductions, attendance integration, and payroll reporting.

2. TEST OBJECTIVES

- **Objective 1:** Verify that payroll calculations (earnings, deductions, taxes) are accurate as per business rules.
- **Objective 2:** Validate that the application supports payroll processing for all employee types (full-time, part-time, contract).
- **Objective 3:** Ensure seamless integration with Attendance, HRMS, and Finance modules.
- **Objective 4:** Confirm compliance with statutory rules (PF, ESI, PT, Income Tax).
- **Objective 5:** Verify system stability, security, performance, and usability.

3. TESTING SCOPE

In-Scope

- Employee master data management
- Salary structure configuration
- Monthly payroll run
- Earnings and deductions calculation
- Statutory compliance (PF, ESI, PT, TDS)
- Attendance/Leave data import
- Pay slip generation
- Payroll reports (Salary Register, PF/ESI/TDS reports)
- Bank advice generation
- Approval workflow
- Role-based access control
- Integration testing with HRMS and Attendance systems

Out-of-Scope

- Third-party payroll outsourcing processes
